

Small high leverage combination pliers with pointed jaws For all common installation and repair work

Handy for use when working in confined areas due to slim head design and pointed jaws (anti-twist)

Gripping surfaces with special convex contour on one side for secure gripping of flat parts

Milled groove in the gripping area permits small parts such as nails, pins and bolts to be held and pulled

- > easy cutting due to the high leverage joint
- > cutting edges for soft, medium hard and hard wire
- > long service life and stable tips
- > high-grade special tool steel; forged, multi stage oil-hardened

08 22 145 T BKA*

Pliers with integrated tether attachment point for tool drop protection system

Milled groove in the gripping area

Firm grip on flat material due to three-point contact

Easy cutting thanks to the high leverage joint

Anti-twist tips remain stable even under high strain
